Fractals | World of Mathematics Fractals are very popular in mathematical visualisation, because they look very beautiful even though they can be created using simple patterns like the ones above. You can zoom into a fractal, and the patterns and shapes will continue repeating, forever. fractals - an overview | ScienceDirect Topics The two fractal illustrations provided here are actually not natural fractal objects, but they are naturalistic. They are human-generated fractals that follow fractal object construction principles, and they closely mimic natural fractal objects. It seems to me that this is a very effective way of demonstrating the fractal behavior of natural objects.
